

CONTENTS

Preface	5
Chapter 1. General Characteristics of Milk Proteins.....	7
1.1 Nutritional and Biological Value of Milk Protein	7
1.2 Physicochemical Properties Of Milk Proteins	9
1.3 Functional-Technological Properties of Milk Proteins.	17
1.4 The Theoretical Foundations of Milk Proteins Production	26
1.5 The Structural-Mechanical Properties of Milk Proteins	32
References	38
Chapter 2. Scientific Substantiation of the Technology of Snack Pastes on the Base of Lactic Acid Curd.....	44
2.1. Substantiation of the model systems' component selection	44
2.1.1. Selection and substantiation of the concentration of lactic acid curd as protein base.....	44
2.1.2. Selection and Substantiation of the Concentration of pH Active Acidity Corrector and Melting Salt	48
2.1.3. Selecting and Substantiating the Fat Component Concentration	60
2.1.4. Substantiation of the choice of a structure-former.....	68
2.2. Investigating the Recipe Ingredients' Effect on the Technological Indices of the Snack Pastes' Model System	74
2.2.1 Changing Processing Temperature	74
2.2.2 Changing duration of structure formation	75
2.3 Substantiation of the Thermal Processing Parameters of Snack Pastes' Model System	77
2.3.1 Investigations of Processing Temperature and Duration	77
2.3.2 Investigating the Forms of Moisture Retention	88
2.3.3 Modeling the Process of Thermal Processing	91
2.4 Researching the Structural-mechanical Characteristics of the Snack Pastes' Model System.....	93
2.5. Investigating the Changes of Fractional Composition of the Protein Complex in the Snack Pastes' Model System.....	100
2.6 Investigating the Influence of the Ratio of the Main Components in the Snack Pastes' Model System on Organoleptic Attributes.....	102
References:	106
Chapter 3. Development of the Technology of the Pastes on the Base of Fat-free Lactic Acid Curd.....	115
3.1. Working out the Recipe and Technology of the Snack Pastes.....	115

3.2. Investigating Physical-Chemical Characteristics of Snack Pastes during Storage	120
3.2.1 Structural-Mechanical Changes	120
3.2.2 Changes of Active Acidity.....	123
3.2.3 Investigating Moisture Loss	124
3.3. Investigating the Nutritional and Biological Value of the Snack Pastes on the Base of Fat-free Lactic Acid Curd	125
3.4 Investigating Sensory Attributes of Quality of the Snack Pastes On The Base Of Fat-Free Lactic Acid Curd.....	133
3.5 Developing the Recommendations on the Use of the Snack Pastes as Culinary Products' Ingredients at Restaurants.....	143
References:	145
